## TRAINING

**Optical Fiber**

Take part throughout the year in our training on copper and optical networks.

### *How does a training day work?*

The training days consist of a theoretical part in the morning and a practical part in the afternoon to apply the acquired skills. Socamont takes you for lunch during the lunch break to share together a moment of conviviality.

**BECAUSE WE ARE A DAILY PARTNER FOR OUR CUSTOMERS, WE ARE ABLE TO TRAIN YOUR TEAMS AT HOME OR AT OUR PREMISES ON THE FOLLOWING TOPICS :  
RACKS & WALL CABINETS, FIBER OPTIC, COPPER LINK CHAIN OR UPS/PDU**

### *How to participate?*

By contacting the sales representative of your sector.

For more information, contact us by email:  
[socamont@socamont.com](mailto:socamont@socamont.com)

**THE 25 YEAR GUARANTEE**

SOCAMONT offers a 25 years warranty COCCINELLE® CERTIFIÉES CAT6 FUTP, et CAT6A FFTP de 25 ans (under certain conditions) :

***Procedure for placing the guarantee:***

The warranty is possible when the installation project is submitted by an approved INSTALLER.

The reason for this is the absolute need to ensure the professionalism of the installer in their ability to deploy LADYBUG® CERTIFIED BINDING CHAINS.

SOCAMONT has selected the best Low Current Installers in the territory able to fully comply with the deployment instructions of our CERTIFIED LADYBUG® LINK CHAINS.

The implementation of the CAT6 FUTP and CAT6A FFTP CERTIFIED LADYBUG® LINK CHAINS WARRANTY is the subject of a warranty request procedure generally written and sent to SOCAMONT by the Design Office or the approved INSTALLER in charge of the installation.

***This guarantee, which cannot be combined with another, covers:***

- Replacement of defective products.
- The consequences directly related to a difficulty of operation of the CERTIFIED CERTIFIED CAT6 FUTP and CAT6A FFTP BINDING CHAIN. The risk is then called "consecutive risk".

The 25-year warranty COCCINELLE® CERTIFIED CAT6 FUTP and CAT6A FFTP is explained in the "COCCINELLE® Binding Chain Warranty" folder available at [www.socamont.com](http://www.socamont.com).

The advantage of keeping to the KEYSTONE standard is that it is easy to implement all the extensions desired by the end customer in a cost-effective way, and immediately.

With our solutions the installation can evolve very well with the needs without any difficulty of supply of the components since they are standard.
